OBJECTIVE : Senior Product Manager

PM, Hippo Information Co., Ltd., Jan 2022 – Present

Product design / Product Development / Product management / Scrum / Manual testing / Automated testing

- Designed and built a video website (App / H5) with a team. It is growing fast and currently has over a million users.
- Built an automated testing mechanism to improve the quality and efficiency of team software through automated testing of the API and UI before release updates. This significantly reduces testing time by 90%.
- Establishment and implementation of RD development projects, task, resource allocation, risk management and control, requires acceptance.

Sr. PM, JINGTONG Co., Ltd., Aug 2021 – Jan 2022

Product design / Product Development / Product management / Machine learning / Scrum / Manual testing / Automated testing

- Led a team of 4 engineers to launch auto-generated articles based on natural language processing (NLP, GPT-2) on public opinion system.
- Designed and built public opinion systems and services from scratch and worked with engineers to bootstrap mobile clients. It automatically collects network public opinion data across Taiwan, mining and analyzing volume, diffusion, emotions, and hot topics, collecting tens of millions of public opinions.
- Designed and built traffic websites by automated posting and fast building. It can be generated by multiple websites at the same time.

Sr. PM, Cloudwise tech Co., Ltd., Aug 2015 – Aug 2021

Product design / Product Development / Product management / Scrum / Machine learning / Manual testing

- Customized systems for governments and companies with teams and coordinated with external organizations and internal teams.
- Research and suggested solution for online shopping center clients. The sales of this solution have increased by 15%.
- Designed and built machine learning models to optimize existing trading strategies. Optimize the trading strategy throughout the model, the number of transactions is reduced by up to 90%, the rate of return is improved, and the risk is reduced.
- Designed and built a non-profit pet database on the web. Users can search for hospitals, pet food manufacturers, pet shops and anything else on the site. The website Natural sorts from 1 through 3 on Google.

Back-end Developer, Cloudwise tech Co., Ltd., Set 2011 – Aug 2015

ASP.NET MVC / MS SQL / C# / LINQ

- Customized systems for governments and companies with teams.
- Built the platform for second-hand books and promotion of the sale of second-hand books in school.
- Built TA matching platform project, allowing TAs and students to conduct related tutoring assignments. From 2012 to 2018, a total of more than 3,000 TA applications, tutored more than 5,000 students, and more than 50,000 teaching records.
